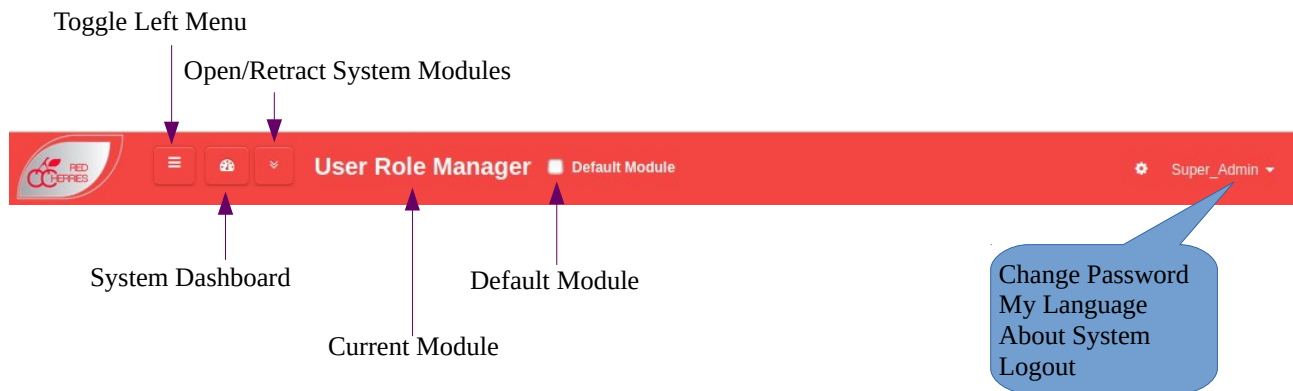

Figure 3

- **Toggle Left Menu** : Show/hide left menu
- **Open/Retract System Modules** : Open/retract system module dashboard. Previous screen preserves if user does not select any module.
- **System Dashboard** : Opens the system modules dashboard. Previous screen does not preserved.
- **Current Module** : Shows the current module that user has selected.
- **Default Module** : Selecting current module as default module will allow to go directly to that module on login to the system.

System Module Sections

“Red Cherries Accounting” is structured as “System Modules” and inside each “System Module” there are “System Module Sections”. “System Modules” and “System Module Sections” are enabled in “Red Cherries Accounting” according to the list of modules and sections purchased by a customer. Modules and sections are enabled in a “Red Cherries Accounting” software license file issued to a customer.

System Module Sections screen in “Red Cherries Accounting” can be accessed from “Product Information → System Module Sections” menu.

Figure 4 shows “System Module” list and “System Module Sections” of each “System Module” and their statuses.

Figure 6

Derive User Roles

If users need to assign custom permissions apart from Default User Role permissions, they should create Derive User Roles using “Admin” or “User” Default User Roles. Derive User Roles screen in “Red Cherries Accounting” can be accessed from “User Roles → Derive User Roles” menu.

- Users can add a Derive User Role by clicking on “Add New Derive User Role” button shown in **Figure 7**.
- A new form shown in **Figure 8** will be opened to add a Derive User Role.
- For “Role” field users has to select a Default User Role type.
- After added a new Derive User Role, the list can be seen as shown in **Figure 7**.

Permissions

In “Red Cherries Accounting” each and every System Module Section Feature has permissions which can be assigned for user roles. There are main four permissions types (Add, Edit, Delete and View). **Figure 9** shows how the Permissions are arranged for each System Module Section Feature. Permissions screen in “Red Cherries Accounting” can be accessed from “User Roles → Permissions” menu.

Default User Role Permissions

Each Default User role of “Red Cherries Accounting” has assigned set of Default Permissions. Those Default Permissions cannot be modified. Default User Role Permissions screen in “Red Cherries Accounting” can be accessed from “User Roles → Default User Role Permissions” menu. **Figure 10** shows how the Default User Role Permissions are assigned for Default User Roles.

If any System Module Section Feature needs to have permissions other than Add, Edit, Delete or View, such permissions are added as Advanced Permissions in “Red Cherries Accounting”. If any System Module Section Feature has Advanced Permissions, that will be denoted by  button as shown in **Figure 10**.

When clicked on  button, users can see a list of Advanced Permissions as shown in **Figure 11**.
