Introduction

This user guide aims at giving you the information required to work with “Administration Section” of “Accounts Manager”. This user guide can be downloaded from “Admin Help” screen shown in **Figure 2** which is accessible from “Administration → Help” menu as shown in **Figure 1**.

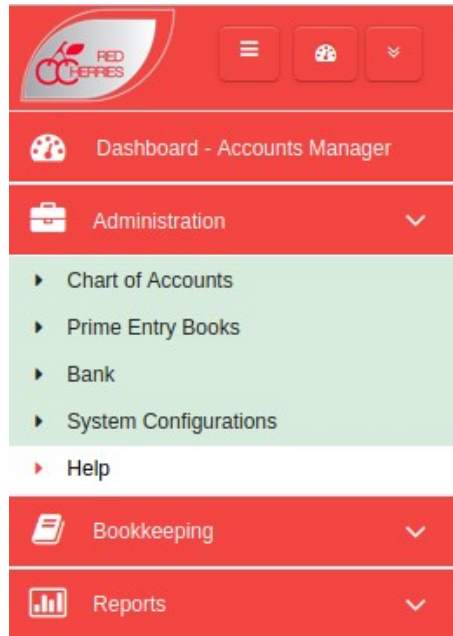

Figure 1

Admin Help

Figure 2

Top Navigation Bar

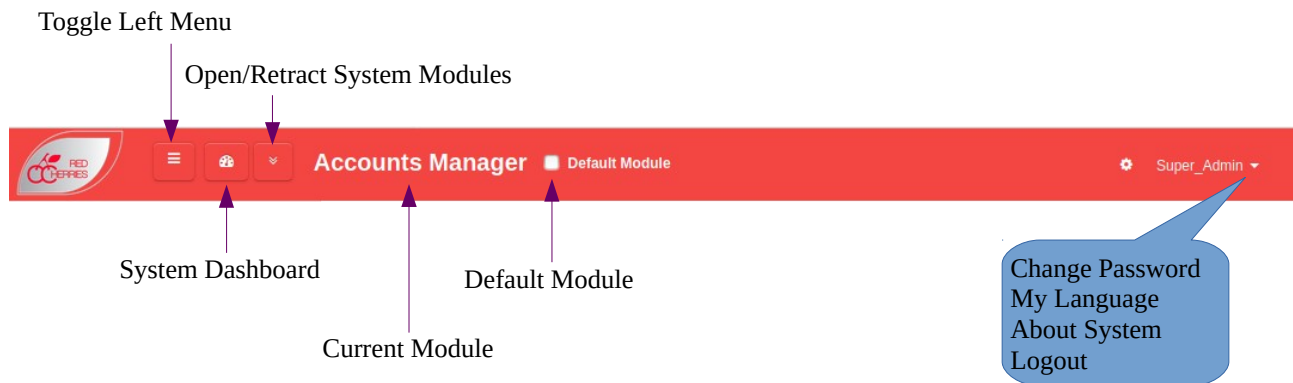

Figure 3

- **Toggle Left Menu** : Show/hide left menu
- **Open/Retract System Modules** : Open/retract system module dashboard. Previous screen preserves if user does not select any module.
- **System Dashboard** : Opens the system modules dashboard. Previous screen does not preserved.
- **Current Module** : Shows the current module that user has selected.
- **Default Module** : Selecting current module as default module will allow to go directly to that module on login to the system.

Dashboard

When a user selects the “Accounts Manager” from System Modules Dashboard in Red Cherries Accounting, the user will see the Accounts Manager Dashboard on the screen. The Dashboard shows the statistical information of Accounts Management Activities and Quick Links to Accounts Manager screens. The user can see the Accounts Manager Dashboard as shown in **Figure 4**.

Accounts Manager Dashboard

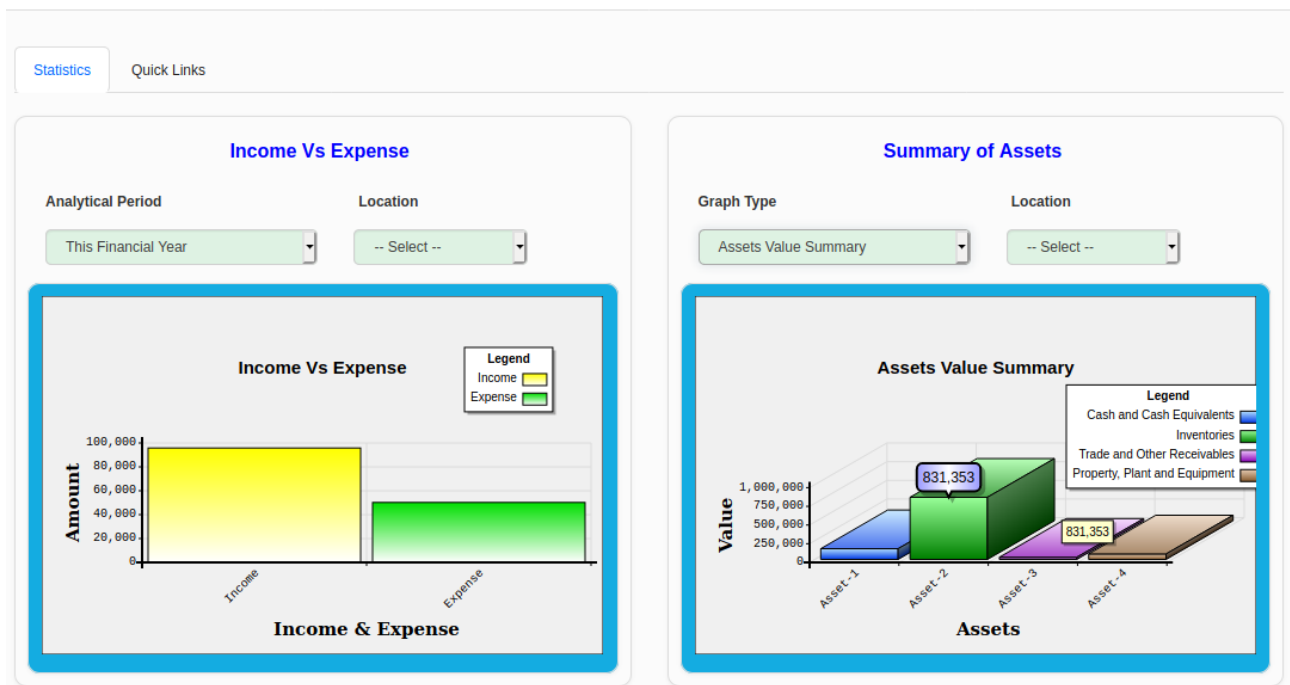

Figure 4

Chart of Accounts

A complete chart of account structure can be maintained in the system and the chart of account list can be accessed from “Administration → Chart of Accounts” menu.

- Chart of Account list is displayed in the system as shown in **Figure 5**.
- Users can see the complete chart of account list after installing the system.

Chart of Accounts

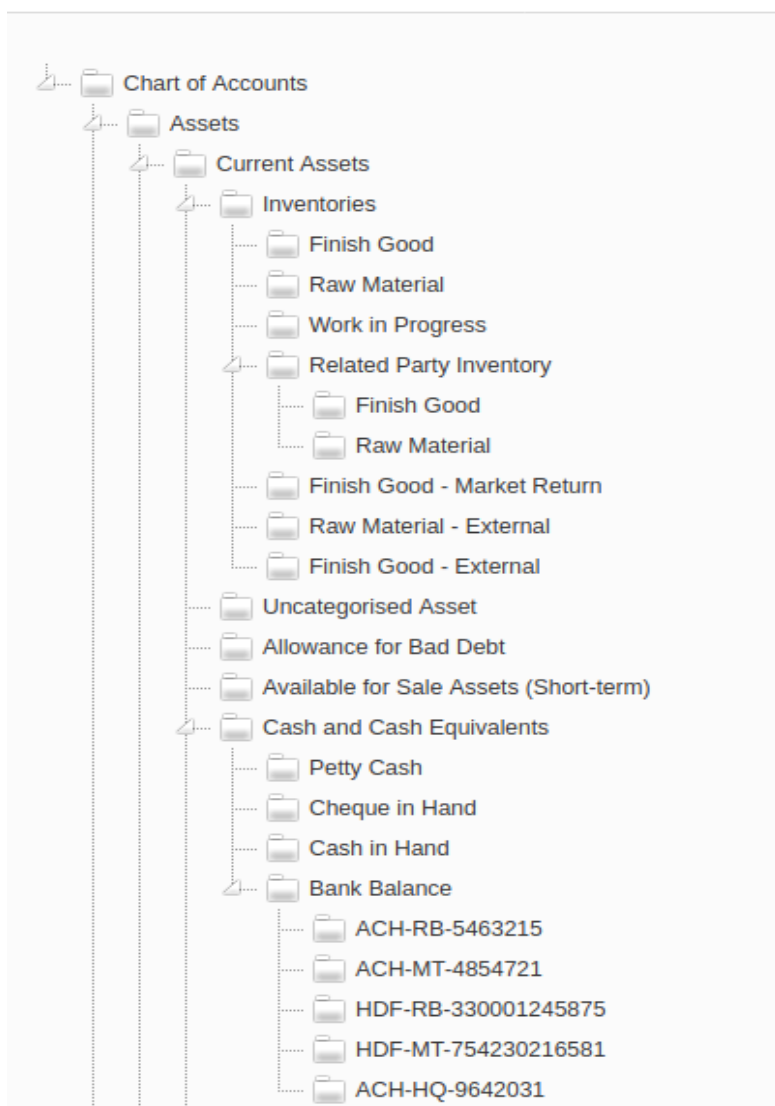

Figure 5

- Users can modify the chart of account structure by right clicking on a particular chart of account name as shown in **Figure 6**.
- When select “Add” or “Edit” menu, a pop up screen will be displayed on the screen as shown in **Figure 7**.
- It is possible to specify a chart of account code and a name for each chart of account.
- Users can easily drag and drop a particular chart of account to restructure the chart of account structure as required.

Chart of Accounts

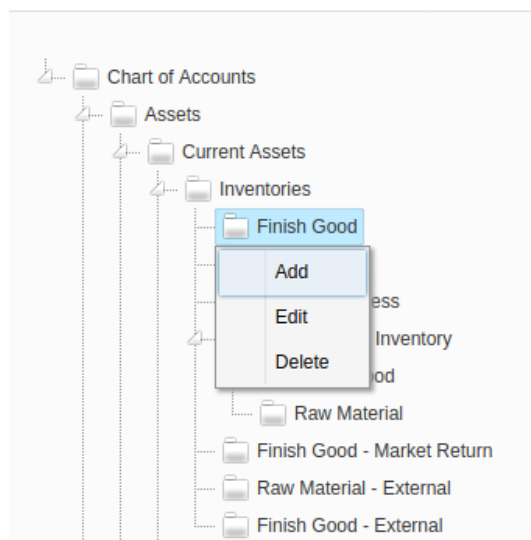

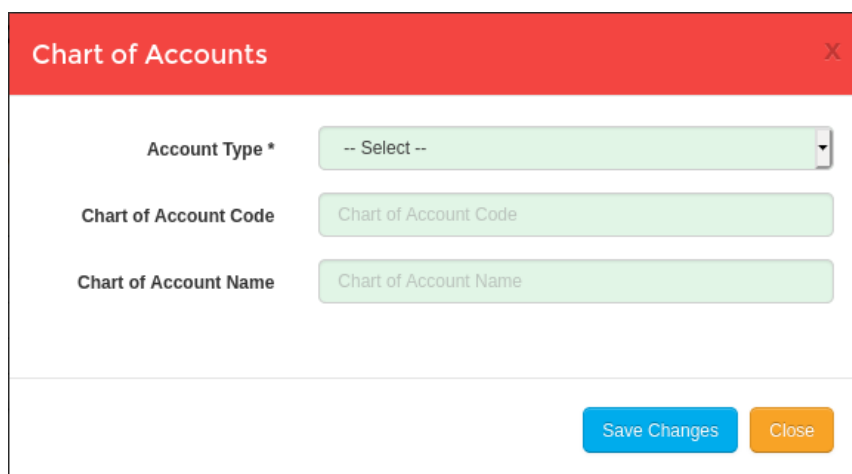

Figure 6

The screenshot shows a pop-up window titled 'Chart of Accounts' with a red header bar and a close button (X) in the top right corner. The form contains three input fields: 'Account Type *' with a dropdown menu showing '-- Select --', 'Chart of Account Code' with a text input field containing 'Chart of Account Code', and 'Chart of Account Name' with a text input field containing 'Chart of Account Name'. At the bottom right, there are two buttons: 'Save Changes' (blue) and 'Close' (orange).

Figure 7

Prime Entry Books

All prime entry books required for accounts journal entry posting can be maintained in prime entry books screen as shown in **Figure 8**, which is accessible from “Administration → Prime Entry Books” menu.

- There are several default prime entry books added from system installation. When required, users can modify the default prime entry books according to the modifications do for chart of accounts structure.
- Additional prime entry books can be added by clicking on “Add New Prime Entry Book” shown in **Figure 8**.

Figure 8

- A new prime entry book can be added on the screen shown in **Figure 9**.
- Users can specify a name for the prime entry book and a description.
- Users can specify whether for which system module they need to use the prime entry book by specifying the module in “Applicable Module” field.
- Also by selecting “Has reference transaction journal entry” check box, users can force to specify a reference journal entry, when posting a journal entry using the new prime entry book.

Ex : When adding a journal entry for an electricity bill payment, it is required to specify the journal entry for electricity bill.

- Further, the system allows users to select multiple debit or credit accounts for the new prime entry book. Multiple debit or credit accounts can be selected by clicking on “Add Another Debit Ledger Account” or “Add Another Credit Ledger Account” buttons as shown in **Figure 9**.

System Configurations

System allows users to control the system behavior via several system configurations. System configurations screen is shown in **Figure 10**, which is accessible from “Administration → System Configurations” menu. System configurations are categorized into their effective screens and reports as shown in **Figure 10**.

General System Configurations

System configurations which are common throughout the accounts manager module are categorized under “General” tab which is available under main “Administration” tab as shown in **Figure 12**.

- Users can specify accounting period starting and end dates into “Financial Year Start” and Financial Year End” fields.
- If users need to maintain accounts for each business locations separately, users should select the “Enable Accounts Management For Locations” check box.
- If any organization is expecting to maintain all sales related information in “Accounts Manager” module, should enable following options for that purpose. When the following options are enabled, the system will show relevant transaction screens in “Accounts Manager” module.
 - Enable Purchase Note
 - Enable Sales Note
 - Enable Customer Return Note
 - Enable Supplier Return Note
- When receive a payment, if it is a must to select a reference transaction for the payment, user should select the “Force To Select A Reference Transaction For Receive A Payment” check box.
- When make a payment, if it is a must to select a reference transaction for the payment, user should select the “Force To Select A Reference Transaction For Make A Payment” check box.
